

# Haiyaa VariPrint Installation

# Haiyaa VariPrint Installation-OS

VariPrint support Windows XP, 7, 8, 10, Server2003, 2008, 2012

# Haiyaa VariPrint Installation-Windows 7

Use Run as Administrator to install VariPrint

1) When installation, some Windows7 OS won't install dongle driver and HAIYAA.PPD properly, in that case, you need to install manually. The dongle driver and HAIYAA.PPD can be download from Software Download webpage, HAIYAA.PPD can also be found in the installation CD.

How to install HAIYAA.PPD, please refer to:

[http://www.haiyaatech.com/english/bbs/b\\_kantie.asp?tiezi=558](http://www.haiyaatech.com/english/bbs/b_kantie.asp?tiezi=558)

2) VariPrint support .NET framework 2.0, 3.5, 4.0 and above.

3) After installation. You should setup the properties of the installation folder-VariPrint to allow this folder to have Write/Read permission.

3-1)go to the installation folder, go to Properties by clicking right mouse button.

3-2)Select Security--Edit--Add, add "everyone", confirm--select "everyone"--select full control--confirm to exit

4) When running VariPrint at first time, you MUST run it as administrator. Under administrator, some software components registration can be done properly.

# Haiyaa VariPrint Installation-Windows 8

Note1: (For installation of HAIYAA.PPD)

From the Metro or Desktop

Bring up Charms by mousing over to the right of the screen

Go to Settings

More PC Settings

General

Advanced Startup > Restart Now

Trouble shoot

Advanced options

Windows startup options

Restart

Click on "Disable driver signature enforcement"

Reboot

Install the relevant driver

Note2:

Go to Control Panel to see if there is independent Microsoft .net Framework 4.5 or 4.6 is installed.

If no independent .net Framework installed, Go to Turn Windows feature on or off to install .net Framework 3.5

# Haiyaa VariPrint Installation-Windows 10

Note1: (For installation of HAIYAA.PPD)

Windows 10 enforces driver signatures by default. To install HAIYAA.PPD, which is not digitally signed, use the following steps to disable driver signature enforcement, and then install HAIYAA.PPD.

Click the Start menu (windows logo) and select Settings.

Click Update and Security, and then click Recovery.

Click Restart now under Advanced Startup.

After computer rebooted, click Troubleshoot.

Click Advanced options, and then click Startup Settings.

Click on Restart.

On the Startup Settings screen press 7 or F7 to disable driver signature enforcement.

Computer will restart and you install HAIYAA.PPD as a printer drivers.

Note: In case that you restart your computer again without completing the PPD installation, the driver signature enforcement will be re-enabled again, have to repeat the procedure again.

Note2:

Go to Control Panel to see if there is independent Microsoft .net Framework 4.5 or 4.6 is installed.

If no independent .net Framework installed, Go to Turn Windows feature on or off to install .net Framework 3.5

# Haiyaa VariPrint Installation-Windows 10

Note3: Disable automatic printer manager

- 1- Use the Windows Key + I keyboard shortcut to open Settings.
- 2- Navigate to Devices, then go to Printers & scanners, and disable the Let Windows manage my default printer.
